## Welcome!

I want to thank you all so much for your support in raising awareness for Ukraine and your generous amount of donations. We are currently in the process of delivering all donations to 'North London Collection Centre'.

If you are interested in any activities for over the half term, the Local Authority have a range of different options you can choose from. I will attach a copy for you.

Lisa Kearne,

Little Marvels Business Coordinator

## Red Nose Day

The children had lots of fun creating their own 'superhero masks' for comic relief. We had a variety of activities dedicated to Red Nose Day and the children were able to contribute their thoughts and feelings in 'group discussion' why we are lucky and what we are grateful for.

## Cornflour Fun

The toddlers have enjoyed exploring the cornflour. We added brown paint and farm animals to create a small world effect of animals in the mud.

The children investigated the texture and shared their thoughts and ideas of the sounds and names of each animal.

The children had a visit from the ducklings. They were very excited to see the ducklings and the children made "quack, quack noises". Children seeing real life animals helps them develop their language skills, it also teaches them about empathy and how we need to be kind and caring towards living things.

## Spring Time!

The pre-schoolers enjoyed creating some flowers for our 'Spring Display'. Elcee used her creativity skills and fine motor skills to create her own daffodil by gluing, sticking and cutting different materials independently. Elcee had her two baby dolls sat beside her to show their support!

## Daisy Picking!

The children love to explore the outdoors environment and as the weather is getting warmer we have been going on more 'Nature Walks'.

## Sensory Play

The babies have been exploring the cornflour and investigating the different marks that can be made. Sensory play is a popular activity for our children and studies show that sensory play helps build nerve connections in the brain. That is why we encourage even our youngest children to explore the different sensory textures. Babies who are exposed to multi-sensory stimulation through toys and activities will develop more awareness and alertness.

### Labelling Personal Items

Can all parents / guardians and carers please ensure that all personal items are labelled with your child's name. We have lots of children in and out every day and do not want to mix their belongings up.

MARCH to  
APRIL 2022
