## Fathers Day

We would like to thank all of our dads/granddads/uncles for coming to our father's day brunch this term, it was lovely seeing you all and spending time with you playing at our nursery for the morning.

## Arts and Crafts

The babies have enjoyed creating animal pictures using dabber pens this term, they loved exploring the dabber pens and how we use them to create marks. Activities like this help the babies develop their fine motor skills, as well as their concentration on activities for longer periods of time.

## Painting

This term the toddlers have enjoyed painting using different fruits to create marks on their pictures. The children enjoyed using something different to paint and explore with. Activities such as this provides children with the opportunity to practice colour, fruit identification and helps develop their gross motor skills.

## Sensory Play

The toddlers have had lots of sensory play this term, one activity they had was to explore and feel the texture of coloured spaghetti. The children really got involved in exploring the texture of the spaghetti Mahika said "its all cold". Sensory activities help develop fine and gross motor skills as well as supporting language development, communication and social skills.

## Focus Activity

This term in baby room the children have been looking into mirrors and learning about facial expressions and looking to see where our features are and if we could spot them ourselves. The babies enjoyed looking into the mirrors and have fun pulling some funny faces. Activities like this help babies develop their visual senses and encourages them to begin to identify their own face as well as familiar faces.

## Labelling Personal Items

Can all parents / guardians and carers please ensure that all personal items are labelled with your child's name. We have lots of children in and out every day and do not want to mix their belongings up.
